

7/21/2021

Dear Grower,

As of August 1st of 2019, the California Code of Regulations regarding Prevention and Eradication of Weedy Rice requires handlers to obtain producer verification of planting certified seed or seed enrolled in a third-party quality assurance program approved by the Certification Committee.

To ensure proper verification in accordance to the Rice Certification Act of 2000, De Pue Warehouse is asking all growers to review the statement below and sign. Feel free to contact me anytime through the office and I will answer any question regarding the new seed regulation.

I, _____ (*grower name printed*), can provide verification that all rice delivered to De Pue Warehouse Company is from a class of certified seed or from a third party quality assurance program.

Entity Name:

Signature: _____

Please note that verification of adherence to this requirement is subject to audit.

Sincerely,

Jim Stewart
De Pue Warehouse Company
